

Discover the Corrupt Acts by Department of Justice Officials that Resulted in the Worst Series of Terrorist Attacks in the Nation's History and Two Deadly Wars

Discover how Department of Justice personnel deep-sixth advance information on the first series of al Qaeda attacks to prevent the public from learning about decades of FBI-DOJ complicity in murders with a brutal Mafia capo known as the "killing machine." (Similar to FBI-DOJ murders in the Boston offices with James "Whitey" Bulger.)

Advance information on the first series of al Qaeda attacks on major U.S. targets was obtained directly from al Qaeda's primary bomber, Ramzi Yousef, and provided to FBI agents in the New York City's offices by a mole in the al Qaeda cell and the mole's New York City attorney.

Discover the ripple effects from deep-sixing the critical advance information of the attacks: the downing of TWA Flight 800; the bombings of U.S. embassies in Kenya and Tanzania; the easily preventable hijackings of U.S. airliners; and the subsequent ripple effects in the invasion of two countries that had no causative role in the 9/11 attacks. Discover the primary enablers of 9/11 holding key positions in U.S. government offices, an extension of other scandals.

The same DOJ personnel involved in the corrupt cover-ups of the planned terrorist attacks then became part of the 9/11 Commission to insure a cover-up. Discover how this granddaddy of American scandals is being kept from the American people.

The factual information is provided by former airline safety inspector Rodney Stich and several of his former covert and law enforcement sources, along with the mole in that al Qaeda cell. This book addresses multiple serious problems in the federal government that adversely affects the American people.

DETAILS DIRECTLY FROM THE MOLE APPEARS IN THE FOLLOWING BOOKS:

Crimes of the FBI-DOJ, Mafia, and al Qaeda

Terrorism and Deadliest Enabling Scandals of 21st Century

History of Aviation Disasters: 1950 to 9/11
