3000 Deaths Made Possible by Documented Corruption and Massive Cover-Ups — Assisted By Public Indifference!!

Never in known history have so many areas of corruption and lying in government, and massive cover-ups, existed to inflict such grievous harm upon the people.

Deadly ramifications follow decades of warnings by insiders, which have been ignored even by families of the victims, and by subsequent victims themselves.

Courageous government insiders reveal deep-seated corruption in the three branches of government that either caused, or enabled, among others, the brutal events of 9-11 to occur. These government insiders reveal, for instance:

- *Deep-seated culture of corruption* in the government's aviation safety offices that caused or enabled decades of preventable aviation disasters— including the hijacking of four airliners by 19 hijackers on September 11, 2001, and 40 years of prior fatal hijackings.
- Other unpublicized areas in which this misconduct caused innocent people to suffer great harm, and even death, including the arrogant and sham "war on drugs."
- The *Trojan-horse corruption* that is a greater threat and source of harm to people than terrorists from *outside* the United States.
- The *corrupt role played by federal judges,* who converted the courts into criminal enterprises as they repeatedly block reports of criminal activities and retaliate against "whistleblowers."
- The repeated *pattern of felony cover-ups by members of Congress.*
- The reason for the *unprecedented delay in conducting a meaningful investigation* into the blame for September 11, 2001.
- The *enormity of lies by government officials*, and the public's gullibility and state of denial in swallowing them.
