

What the Public Doesn't Know About the *Real* Blame For September 11 Will Continue To Tragically Affect, and Even Kill, Americans

The unprecedented lying by America's leaders must be understood by those Americans who are either being deceived, or who are in willful blindness to the deception perpetrated upon America and its people. The documented misconduct described in these books, written by and with the input of dozens of deep-cover government agents, provides an inside look to the threat from Trojan horse terrorism that is greater than any threat from terrorists.

- The primary blame for the success of 19 hijackers is hardcore corruption in the government's air safety offices. These deep-rooted problems, associated with 40 years of fatal hijackings and preventable aviation disasters will not be corrected by the existing cover-ups.
- The "intelligence failure" argument is a deliberate diversion from the misconduct that encouraged and insured the success of 19 hijackers and the tragic consequences. So-called intelligence failures were strictly secondary, and were far worse than merely "failures."
- Documented efforts to prevent the public from discovering these crimes against the United States involved felony cover-ups by Justice Department personnel, members of Congress, and federal judges. Each have repeatedly blocked every attempt to expose the federal crimes that created the conditions which aided and abetted the events of September 11.
- Harm suffered by the American people from external terrorism is only part of the awesome problems that continue to inflict enormous harm upon unsuspecting Americans. This cause and effect will not change unless a few good people become outraged and show some semblance of courage and patriotism.
- One of the many other areas emanating from the deep-seated widespread corruption in government is the arrogant and corrupt war on drugs that destroys thousands of American families and lives. This duplicity has tentacles to the conditions that made possible the events of September 11 and subsequent similar events.
- Patriotism demands that these matters be recognized and acted upon by the public. It is unpatriotic, and tragic, as shown by the events of 9-11, to remain ignorant or indifferent to the serious problems that dozens of government insiders have tried to bring to the public's attention. The deaths of 3,000 could have been prevented if a few good people showed courage, outrage, and real patriotism. This requires becoming informed on the deep-seated hardcore misconduct in government.
