

# A Far More Serious Side to the Clinton Saga

The explosive 1998 edition of *Defrauding America* details and documents conduct by Bill Clinton that is far more detrimental to the United States than the "bimbo" affairs. Making crude-sex attempts in the highest office of the United States is bad enough, but even worse for America was Clinton's heavy association with those engaging in drug-related crimes. Among the many schemes against Americans, described in *Defrauding America*, those that touch directly upon Clinton include:

- Clinton's pattern of conduct aiding and abetting the drugging of America while in Arkansas.
- Clinton's coverup of the CIA's drug trafficking activities in Arkansas.
- The reported drug-sex parties in Arkansas, attended by Clinton, at which young girls traded sex for drugs.
- Pattern of near-fatal beating, killings, and suspicious deaths of people whose knowledge was detrimental to Bill Clinton.

• Operation Mount Rushmore, a reported covert scheme to assassinate presidential candidate Bill Clinton in 1992 while visiting San Francisco, and the recent Secret Service attempt to address that matter.

These and many more matters adversely affecting America are detailed and documented in *Defrauding America*. This encyclopedia of little-known behind-the-scene covert activities was written by former federal investigator Rodney Stich with the help of over two dozen present and former government agents and deep-cover operatives. It is a block-buster waiting for the public to realize its gravity. He has appeared as guest and expert on over 2500 radio and television shows since 1978 in the United States, Canada, Mexico, Holland, France, and Germany.

Have a better understanding of the Bill Clinton saga by reading this informative encyclopedia of inside-government tricks and those played upon Americans by a mostly compliant broadcast and print media.
