

Hardcore Documented Corruption In Government, It's Cover-Up, and Public Indifference, Made September 11 Tragedies Simply the Latest Déjà Vu Consequences In A Continuing Series Of American Tragedies

Courageous government insiders have been revealing the corruption in the three branches of government that insured the success of the September 11 terrorist hijackers. This information *must* be understood—and acted upon by the public, to even *start* to correct the Trojan-horse corrupt activities that aided and abetted the terrorist acts of 9-11. Learn about this arrogance and corruption from former and present government agents and discover the evidence needed to bring about corrective actions. For example:

- **Federal Aviation Administration.** This is where the primary blame lies for the success of 19 terrorist hijackers on September 11—and for 40 years of prior fatal hijackings. Former federal air safety inspector Rodney Stich has addressed this corruption as an independent prosecutor, to a federal grand jury, in federal lawsuits. The corruption within the FAA includes, for instance, threats against inspectors who report major safety problems and safety violations; destruction of official reports relating to these matters; retaliating against inspectors who report the problems; perjury and fraud during independent prosecutor hearing; refusal to act on major crash causing problems, including the decades of easily preventable hijackings.
- **FBI and other Justice Department Personnel.** Documented pattern of cover-ups and retaliation against government agents. Examples include (a) blocking reports of corruption in the FAA related to a series of airline disasters; (b) blocking investigation into the theft of suitcase nuclear bombs being smuggled from Russian arsenals through Lithuanian; (c) blocking discovery of the terrorist groups that had already received these nuclear devices; (d) blocking the identity of FBI and CIA agents providing information to Russian intelligence agencies; (e) halting the efforts of a multi-agency drug task force targeting the drug money source of Jersey City terrorists, which was then followed by the same terrorists bombing the World Trade Center in 1993, by plans to place bombs on 11 U.S. airliners departing Far East locations, and plans to fly hijacked airliners into large buildings; (f) conduct enabling terrorists to acquire large numbers of surface-to-air missiles; (g) and much more.
- **Pattern of Judicial corruption.** Large numbers of federal judges (a) repeatedly blocked the reporting of criminal activities to federal courts that government agents sought to report under the federal crime report-

ing statute (18 U.S.C. § 4); (b) judicial retaliation against a former government agent for attempting to make the reports of criminal and subversive activities; (c) issuing unlawful and unconstitutional orders permanently terminating the civil and constitutional rights of the former government agent attempting to report the criminal activities; and (d) acting in a conspiracy with a CIA-front law firm to forever block the former agent from continuing with his public-spirited exposure activities.

- **Congressional cover-ups.** A long pattern of cover-ups and obstruction of justice by large numbers of House and Senate personnel relating to the above criminal activities, and much more, that a group of former government agents sought to report. The present congressional "investigation" is another exercise in damage control, making possible continuation of the criminal activities and continuation of the resulting tragedies, and showing contempt for the 3,000 lives lost on September 11.

- **Public's Role In the September 11 Tragedies.** Information and evidence revealing the corruption in government and the resulting tragedies have been repeatedly made available to the public. If a few courageous and outraged Americans had only exercised some semblance of patriotism, attention could have been focused on these matters and many tragedies, including September 11, prevented. It is not patriotic to cover up for the arrogance and corruption in government that made possible the horrendous deaths of 3,000 people! If history

is any indication, the tragedy-related corruption will continue, the same public indifference and denial will continue, making possible even greater tragedies. What will it take to motivate the American public! Do nothing, and *you* become complicit in these crimes and their consequences! If the consequences of the corruption and culture of denial isn't yet recognized, look at the pictures of people jumping out of the World Trade Center buildings for a dose of reality!

- **Further information and evidence**, including revealing letters sent to members of Congress, and court documents, can be found at www.defraudingamerica.com and www.unfriendlyskies.com.

Further details can be found in the books listed on this page. A heavy price was paid by the contributors to these books, including loss of life, loss of liberties and freedoms, and financial destruction. No other known book has been written using the input from several dozen government agents trying to inform and wake up the public.
