

# Information That the Public *Must* Address To Understand and Prevent *Continuation* Of Terrorist Tragedies In the United States

Government insiders reveal the misconduct by U.S. personnel that insured the success of the September 11, 2001, terrorist hijackers. This information must be understood by the public to prevent even worse tragedies suffered throughout America. Successful fight and defense against the vast terrorist threat requires identifying, removing the guilty, and acting to prevent a continuation of the misconduct by government officials that made the 6,000 plus deaths possible. Learn from insiders about the:

- Corrupt culture within the FAA that made possible a history of air tragedies and fatal hijackings, including the September 11, 2001, events. (Details in *Unfriendly Skies*.)
- FAA refusal to act upon reports and recommendations of its own air safety inspectors that would have prevented the September 11th hijackings. (Details in *Unfriendly Skies*.)
- History of other air disasters, including the prior United Airlines crash into New York City (world's worst at that time) that resulted from documented corruption within the FAA. (Details in FAA and judicial records and third edition of *Unfriendly Skies*.)
- Justice Department personnel who protected the drug trafficking activities that funded the terrorist cells responsible for the subsequent bombing of the World Trade Center. (Details in *Drugging America*.)
- Justice Department personnel retaliating against government agents who discovered and sought to arrest terrorist cells using drug activities to fund the 1993 bombing of the World Trade Center.
- Documented cover-ups and obstruction of justice by various government checks and balances. (Details in *Unfriendly Skies*, 3rd ed.)
- Conduct by FBI and CIA personnel that made possible the acquisition of surface-to-air missiles by Afghan terrorists. (Details in *Defrauding America*, 3rd ed.)
- FBI and CIA personnel blocking cooperation with Afghan General Rashid Dostum of the northern alliance. (Details in *Defrauding America*, 3rd ed.)
- Deluge of nebulous statements by U.S. leaders since the September 11 attacks that protects those whose misconduct made possible the successful hijackings. Continued blind acceptance of outright false statements can have severe blowback consequences for Americans.
- Decades of U.S. covert activities resulting in millions of deaths of innocent people, and public apathy, generated worldwide hatred of the United States.

These books are authored by a former FAA inspector responsible for air safety at United Airlines, a former airline pilot with Middle East experience, former Navy pilot, and confidant to dozens of government agents, including former heads of secret CIA airlines and secret CIA financial operations.

These books are based on hard facts discovered and revealed by federal insiders.
