

Receive a "College Education" on Government Corruption, "Taught" by former CIA, FBI, and other Agents and Deep-Cover Operatives—and former drug traffickers

Reading and assimilating the three latest books written by a former federal investigator, Rodney Stich, assisted by dozens of government insiders and former drug traffickers, Mafia family members and others, will do more for your understanding of the government's sham and corrupt war on drugs than any college course—if such a course existed.

DRUGGING AMERICA—A Trojan Horse

Reveals, for instance—

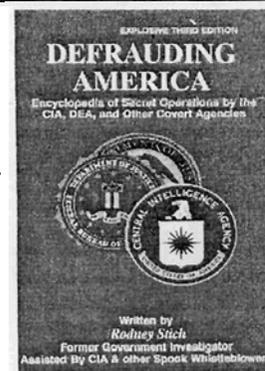

- Decades of drug smuggling into the United States by the CIA, in collaboration with foreign drug cartels and organized crime.
- Coverups of these crimes by other government personnel, including those in the Department of Justice and Congress, and key people in the broadcast and print media.
How anyone can be set up and falsely charged with drug offenses and sent to prison, regardless of innocence. And how to reduce this risk.
- Why most Americans are unaware of these criminal activities and the consequences.
- The tragedy of thousands of men and women sentenced to long prison terms, many of whom are either innocent of the charges, or guilty of offenses justifying far less penalties.
The contradiction between prosecutors protecting CIA agents smuggling tons of drugs into the United States while prosecuting men and women on non-drug "conspiracy" charges or a peanut quantity of drugs.
How to force repeal of draconian mandatory minimum prison, conspiracy, and forfeiture statutes, and bring about the release of many men and women imprisoned on minor drug charges.
- The powerful forces inside and outside of government that will block corrective actions.
- Routine practice of perjured testimony suborned by prosecutors that put people in prison who are often innocent of the exaggerated charges.

DEFRAUDING AMERICA—Encyclopedia of Secret Operations by the CIA, DEA, and Other Covert Agencies

Reveals, for instance—

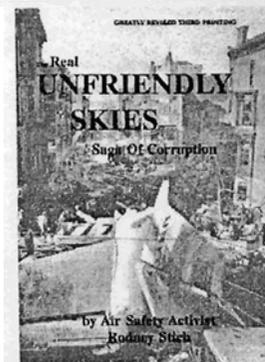

- Pattern of criminal activities by people in control of the CIA and other agencies and branches of government.
- Secret CIA airlines and financial operations, and how they have been used with tragic consequences against the American people.
- Pattern of retaliation against government agents and ordinary citizens who report criminal activities of government personnel and secret operations.
Secrets behind the bombing of PAA Flight 103 over Lockerbie and the truth relating to TWA Flight 800 and its unprecedented government coverup.
Includes continuous pattern of corrupt covert activities, including October Surprise, CIA looting of HUD, savings and loans and other financial scams, judicial and Justice Department corruption in the bankruptcy courts that corruptly seizes people's assets, Inslaw, CIA drug smuggling activities with foreign drug cartels and organized crime, incarceration of government agents who report high-level government corruption, Nugan Hand Bank, BBRDW, corruption in the federal courts, in Congress, and throughout the executive branch, hoaxes and harm inflicted upon Americans—as reported by government insiders.

UNFRIENDLY SKIES

Reveals, for instance—

- Major scandals behind some of America's worst airline crashes, revealed by documents in the possession of former FAA inspector-investigator Rodney Stich.
How United Airlines engaged in a pattern of air safety and criminal violations that played a direct role in a series of fatal airline crashes, and the coverup by FAA and NTSB personnel.
- Hidden dangers in different aircraft arising from the profitable politics of air safety and the revolving door syndrome.
- Coverups and falsification of NTSB accident reports which caused and made possible subsequent crashes (and subsequent NTSB coverups).
- How aircrash victims are often scapegoats in the politics of air safety.
- How the politics of air safety threatens everyone who flies.
- The unprecedented "independent counsel" investigation of FAA wrongdoings and the role played in a series of fatal airline crashes kept from the public.
How many previously litigated crash-related lawsuits can be relitigated on the basis of documented fraud withheld from the public.
